Methods and constructs

Theoretical

Computational methods for electronic structure

Electrical properties of a charged surface in a general electrolyte solution, Y.-C. Kuo and J.-P. Hsu 236 (1998) 1

CARS studies of bending states of CO_2: evidence of collisional rotational transitions with odd ΔJ, A.P. Kouzov, D.N. Kozlov and B. Hemmerling 236 (1998) 15

Franck–Condon effects in low-energy states of $C_{10}H_8^+$ radical. Ab initio MCSCF study of absorption and resonance Raman spectra, T. Andruniow and M. Pawlikowski 236 (1998) 25

Vibronic coupling effects in the low-energy $1\,^2B_{1g}$ and $2\,^2B_{1g}$ states of the $C_{10}H_8^+$ radical, T. Andruniow and M. Pawlikowski 236 (1998) 35

Ultraviolet absorption spectrum and cross-sections of vinyl (C_2H_3) radical in the 225–238 nm region, A. Fahr, P. Hassanzadeh and D.B. Atkinson 236 (1998) 43

Decomposition of perchlorodisiloxane, D. Wichmann and K. Jug 236 (1998) 87

A comparative study of the electronic structure of α-MnS (alabandite) calculated at the Hartree-Fock and Density Functional levels of theory, R. Tappero and A. Lichanot 236 (1998) 97

-CI and valence bond approach

Theoretical study of the ethylene radical cation: geometry and hyperfine structure, N. Salhi-Benachenhou, B. Engels, M.-B. Huang and S. Lunell 236 (1998) 53

-perturbative and many body approaches

Theoretical study of the ethylene radical cation: geometry and hyperfine structure, N. Salhi-Benachenhou, B. Engels, M.-B. Huang and S. Lunell 236 (1998) 53

Electrical interaction between two spherical particles covered by an ion-penetrable charged membrane, J.-P. Hsu and B.-T. Liu 236 (1998) 63

Study of positronium hydride with a simple wavefunction: Application to the Stark effect of PsH, C. Le Sech and B. Silvi 236 (1998) 77

Decomposition of perchlorodisiloxane, D. Wichmann and K. Jug 236 (1998) 87

-density functional theory

A comparative study of the electronic structure of α-MnS (alabandite) calculated at the Hartree-Fock and Density Functional levels of theory, R. Tappero and A. Lichanot 236 (1998) 97

PII: S0301-0104(98)00274-2

Semiempirical methods
Modelling aluminium clusters with an empirical many-body potential, L.D. Lloyd and R.L. Johnston 236 (1998) 107

Wavefunctions for highly excited and unbound states
A semiclassical study of dissociation dynamics in He + H_2 collisions, K. Sakimoto 236 (1998) 123

Spin states and magnetic interactions
A comparative study of the electronic structure of α-MnS (alabandite) calculated at the Hartree-Fock and Density Functional levels of theory, R. Tappero and A. Lichanot 236 (1998) 97
Electronic structure of planar superconducting systems. From finite to extended model, S. Larsson 236 (1998) 133

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
Role of the local electric field in electro-absorption spectra of molecular crystals, R.W. Munn 236 (1998) 151

Radiative (incl. relativistic) effects on molecules and molecular processes
Interplay of creation, propagation, and relaxation of an excitation in a dimer, J. Peřina, Jr. 236 (1998) 157

Scattering of waves and particles
A semiclassical study of dissociation dynamics in He + H_2 collisions, K. Sakimoto 236 (1998) 123

Collisional and reactive molecular dynamics with non-frictional forces
A semiclassical study of dissociation dynamics in He + H_2 collisions, K. Sakimoto 236 (1998) 123
On the $O_2(v') + O_2(v'')$ atmospheric reaction. II. The role of rotational excitation, W. Wang and A.J. C. Varandas 236 (1998) 181
The mechanism of energy transfer in H_2O–H_2O collisions – a molecular dynamics simulation, H. Svedung, L.E.B. Börjesson, N. Marković and S. Nordholm 236 (1998) 189

Reactive molecular dynamics including dissipative processes
Femtosecond pump–probe studies of chlorine dioxide photochemistry in water and acetonitrile, M.J. Philpott, S.C. Hayes and P.J. Reid 236 (1998) 207

Intramolecular dynamics
Vibrational modes in layered double hydroxides and their calcined derivatives, W. Kagunya, R. Baddour-Hadjean, F. Kooli and W. Jones 236 (1998) 225

Molecular dynamics of many particle systems and condensed phases
An intermolecular potential function for Na^+–acetonitrile obtained from ab initio calculations. Application to liquid simulations, E.M. Cabaleiro-Lago and M.A. Ríos 236 (1998) 235
Constant temperature simulations using the Langevin equation with velocity Verlet integration, M.G. Paterlini and D.M. Ferguson 236 (1998) 243
Vibrational spectroscopy and molecular dynamics of solvated methanol tetramer and pentamer, D. Meyer zum Büschenfelde and A. Staib 236 (1998) 253
Interference-effects in the laser-induced desorption of small molecules from surfaces: a model study, S. Thiel, T. Klüner and H.-J. Freund 236 (1998) 263

Quasiparticle dynamics (incl. excitons, polarons)
Electronic structure of planar superconducting systems. From finite to extended model, S. Larsson 236 (1998) 133

Statistical computational methods (incl. Monte Carlo)
Modelling aluminium clusters with an empirical many-body potential, L.D. Lloyd and R.L. Johnston 236 (1998) 107
An intermolecular potential function for Na^+–acetonitrile obtained from ab initio calculations. Application to liquid simulations, E.M. Cabaleiro-Lago and M.A. Ríos 236 (1998) 235

Dynamics of structures, lattices and macromolecular conformations
Constant temperature simulations using the Langevin equation with velocity Verlet integration, M.G. Paterlini and D.M. Ferguson 236 (1998) 243

Non-equilibrium statistical mechanics
Analytical theory of time-resolved fluorescence anisotropy and dynamic stokes shift of polar solute molecules based on continuum model for solvent, F. Tanaka and N. Mataga 236 (1998) 277

Equilibrium statistical mechanics and thermodynamics
Electrical properties of a charged surface in a general electrolyte solution, Y.-C. Kuo and J.-P. Hsu 236 (1998) 1
Constant temperature simulations using the Langevin equation with velocity Verlet integration, M.G. Paterlini and D.M. Ferguson 236 (1998) 243
Vibrational spectroscopy and molecular dynamics of solvated methanol tetramer and pentamer, D. Meyer zum Büschenfelde and A. Staib 236 (1998) 253

Experiment

Magnetic resonances
Isotope effect in diffusion of methyl radicals in glassy ethanol-1,2 d_5 at low temperatures, V.L. Vyazovkin and V.A. Tolkatchev 236 (1998) 291
Recognition and characterization of binding modes of Δ- and Λ-$[Ru(phen)_3]^{2+}$ and Δ- and Λ-$[Ru(phen)_2DPPZ]^{2+}$ by the ^{23}Na NMR relaxation and binding free energy parameters, F.C. Marincola, M. Casu, G. Saba, A. Lai, P. Lincoln and B. Nordén 236 (1998) 301

Molecular spectroscopy
Vibronic coupling effects in the low-energy $1\,^2B_{1g}$ and $2\,^2B_{1g}$ states of the $C_{10}H_8^+$ radical, T. Andruniow and M. Pawlikowski 236 (1998) 35
Vibrational modes in layered double hydroxides and their calcined derivatives, W. Kagunya, R. Baddour-Hadjean, F. Kooli and W. Jones 236 (1998) 225

-Raman
CARS studies of bending states of CO_2: evidence of collisional rotational transitions with odd ΔJ, A.P. Kouzov, D.N. Kozlov and B. Hemmerling 236 (1998) 15
Franck–Condon effects in low-energy states of $C_{10}H_8^+$ radical. Ab initio MCSCF study of absorption and resonance Raman spectra, T. Andruniow and M. Pawlikowski 236 (1998) 25
Sub-picosecond excited-state dynamics of a carotenoid (spirilloxanthin) in the light-harvesting systems of *Chromatium vinosum*. Relaxation process from the optically allowed S_2 state, H. Okamoto, M. Ogura, T. Nakabayashi and M. Tasumi 236 (1998) 309

-UV

Vibronic coupling effects in the low-energy $1\,^2B_{1g}$ and $2\,^2B_{1g}$ states of the $C_{10}H_8^+$ radical, T. Andruniow and M. Pawlikowski 236 (1998) 35

Ultraviolet absorption spectrum and cross-sections of vinyl (C_2H_3) radical in the 225–238 nm region, A. Fahr, P. Hassanzadeh and D.B. Atkinson 236 (1998) 43

Interference-effects in the laser-induced desorption of small molecules from surfaces: a model study, S. Thiel, T. Klüner and H.-J. Freund 236 (1998) 263

Emission spectra of $HeAr_2^+$ and $HeKr_2^+$ heterotrimer ions produced in a helium flowing afterglow, M. Tsuji, M. Tanaka, E. Oda, H. Ishimi and Y. Nishimura 236 (1998) 319

-visible

Vibronic coupling effects in the low-energy $1\,^2B_{1g}$ and $2\,^2B_{1g}$ states of the $C_{10}H_8^+$ radical, T. Andruniow and M. Pawlikowski 236 (1998) 35

Emission spectra of $HeAr_2^+$ and $HeKr_2^+$ heterotrimer ions produced in a helium flowing afterglow, M. Tsuji, M. Tanaka, E. Oda, H. Ishimi and Y. Nishimura 236 (1998) 319

Photophysical and lasing properties of pyrromethene 567 dye in liquid solution. Environment effects, F. López Arbeloa, T. López Arbeloa, I. López Arbeloa, I. García-Moreno, A. Costela, R. Sastre and F. Amat-Guerri 236 (1998) 331

On the electronic energy disposal of calcium excited atom reactions with halogen-containing compounds: Electronic branching ratio and spin–orbit state populations, M. Garay, C.A. Rinaldi, J.M. Orea and A. González Ureña 236 (1998) 343

Ultrafast measurements

Femtosecond pump–probe studies of chlorine dioxide photochemistry in water and acetonitrile, M.J. Philpott, S.C. Hayes and P.J. Reid 236 (1998) 207

Analytical theory of time-resolved fluorescence anisotropy and dynamic stokes shift of polar solute molecules based on continuum model for solvent, F. Tanaka and N. Mataga 236 (1998) 277

Sub-picosecond excited-state dynamics of a carotenoid (spirilloxanthin) in the light-harvesting systems of *Chromatium vinosum*. Relaxation process from the optically allowed S_2 state, H. Okamoto, M. Ogura, T. Nakabayashi and M. Tasumi 236 (1998) 309

Ultrafast intermolecular electron transfer in coumarin–hydrazine system, H. Shirota, H. Pal, K. Tominaga and K. Yoshihara 236 (1998) 355

Synchrotron spectroscopies

A study of the spectroscopic and thermodynamic properties of furan by means of photoabsorption, photoelectron and photoion spectroscopy, E.E. Rennie, C.A.F. Johnson, J.E. Parker, D.M.P. Holland, D.A. Shaw, M.A. MacDonald, M.A. Hayes and L.G. Shpinkova 236 (1998) 365

Atomic and molecular beam techniques

On the electronic energy disposal of calcium excited atom reactions with halogen-containing compounds: Electronic branching ratio and spin–orbit state populations, M. Garay, C.A. Rinaldi, J.M. Orea and A. González Ureña 236 (1998) 343

Rotational alignment from the reactions $Sr(^3P_J) + CCl_4$ and $CHCl_3$, M.-L. Wang, K.-L. Han, J.-P. Zhan, J.-H. Huang and G.-Z. He 236 (1998) 387

Radiolysis

Positronium formation and quenching in frozen and liquid solutions in octanol, F. Bockstahl, I. Billard, G. Duplâtre and A. Bonnenfant 236 (1998) 393

X-ray, electron and neutron diffraction
An intermolecular potential function for Na^+–acetonitrile obtained from ab initio calculations. Application to liquid simulations, E.M. Cabaleiro-Lago and M.A. Ríos 236 (1998) 235

Objects

Bulk systems

Gases
CARS studies of bending states of CO_2: evidence of collisional rotational transitions with odd ΔJ, A.P. Kouzov, D.N. Kozlov and B. Hemmerling 236 (1998) 15
Ultraviolet absorption spectrum and cross-sections of vinyl (C_2H_3) radical in the 225–238 nm region, A. Fahr, P. Hassanzadeh and D.B. Atkinson 236 (1998) 43
On the $O_2(v') + O_2(v'')$ atmospheric reaction. II. The role of rotational excitation, W. Wang and A.J. C. Varandas 236 (1998) 181
Emission spectra of $HeAr_2^+$ and $HeKr_2^+$ heterotrimer ions produced in a helium flowing afterglow, M. Tsuji, M. Tanaka, E. Oda, H. Ishimi and Y. Nishimura 236 (1998) 319

Liquid mixtures and solutions
Femtosecond pump–probe studies of chlorine dioxide photochemistry in water and acetonitrile, M.J. Philpott, S.C. Hayes and P.J. Reid 236 (1998) 207
An intermolecular potential function for Na^+–acetonitrile obtained from ab initio calculations. Application to liquid simulations, E.M. Cabaleiro-Lago and M.A. Ríos 236 (1998) 235
Vibrational spectroscopy and molecular dynamics of solvated methanol tetramer and pentamer, D. Meyer zum Büschenfelde and A. Staib 236 (1998) 253
Analytical theory of time-resolved fluorescence anisotropy and dynamic stokes shift of polar solute molecules based on continuum model for solvent, F. Tanaka and N. Mataga 236 (1998) 277
Photophysical and lasing properties of pyrromethene 567 dye in liquid solution. Environment effects, F. López Arbeloa, T. López Arbeloa, I. López Arbeloa, I. García-Moreno, A. Costela, R. Sastre and F. Amat-Guerri 236 (1998) 331
Positronium formation and quenching in frozen and liquid solutions in octanol, F. Bockstahl, I. Billard, G. Duplâtre and A. Bonnenfant 236 (1998) 393

Crystals
A comparative study of the electronic structure of α-MnS (alabandite) calculated at the Hartree-Fock and Density Functional levels of theory, R. Tappero and A. Lichanot 236 (1998) 97
Electronic structure of planar superconducting systems. From finite to extended model, S. Larsson 236 (1998) 133
Role of the local electric field in electro-absorption spectra of molecular crystals, R.W. Munn 236 (1998) 151

Glasses
Isotope effect in diffusion of methyl radicals in glassy ethanol-1,2 d_5 at low temperatures, V.L. Vyazovkin and V.A. Tolkatchev 236 (1998) 291

Complex fluids

-colloidal suspensions

Electrical properties of a charged surface in a general electrolyte solution, Y.-C. Kuo and J.-P. Hsu 236 (1998) 1

Electrical interaction between two spherical particles covered by an ion-penetrable charged membrane, J.-P. Hsu and B.-T. Liu 236 (1998) 63

Surfaces

Interference-effects in the laser-induced desorption of small molecules from surfaces: a model study, S. Thiel, T. Klüner and H.-J. Freund 236 (1998) 263

Low-dimensional materials

Vibrational modes in layered double hydroxides and their calcined derivatives, W. Kagunya, R. Baddour-Hadjean, F. Kooli and W. Jones 236 (1998) 225

Biological systems

Recognition and characterization of binding modes of Δ- and Λ-$[Ru(phen)_3]^{2+}$ and Δ- and Λ-$[Ru(phen)_2DPPZ]^{2+}$ by the ^{23}Na NMR relaxation and binding free energy parameters, F.C. Marincola, M. Casu, G. Saba, A. Lai, P. Lincoln and B. Nordén 236 (1998) 301

Sub-picosecond excited-state dynamics of a carotenoid (spirilloxanthin) in the light-harvesting systems of *Chromatium vinosum*. Relaxation process from the optically allowed S_2 state, H. Okamoto, M. Ogura, T. Nakabayashi and M. Tasumi 236 (1998) 309

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)

Study of positronium hydride with a simple wavefunction: Application to the Stark effect of PsH, C. Le Sech and B. Silvi 236 (1998) 77

Molecules (neutral and ionic)

On the $O_2(v') + O_2(v'')$ atmospheric reaction. II. The role of rotational excitation, W. Wang and A.J. C. Varandas 236 (1998) 181

-diatomic

A semiclassical study of dissociation dynamics in He + H_2 collisions, K. Sakimoto 236 (1998) 123

Rotational alignment from the reactions $Sr(^3P_J) + CCl_4$ and $CHCl_3$, M.-L. Wang, K.-L. Han, J.-P. Zhan, J.-H. Huang and G.-Z. He 236 (1998) 387

-small polyatomics

CARS studies of bending states of CO_2: evidence of collisional rotational transitions with odd ΔJ, A.P. Kouzov, D.N. Kozlov and B. Hemmerling 236 (1998) 15

Decomposition of perchlorodisiloxane, D. Wichmann and K. Jug 236 (1998) 87

The mechanism of energy transfer in H_2O–H_2O collisions – a molecular dynamics simulation, H. Svedung, L.E.B. Börjesson, N. Marković and S. Nordholm 236 (1998) 189

Femtosecond pump–probe studies of chlorine dioxide photochemistry in water and acetonitrile, M.J. Philpott, S.C. Hayes and P.J. Reid 236 (1998) 207

Rotational alignment from the reactions $Sr(^3P_J) + CCl_4$ and $CHCl_3$, M.-L. Wang, K.-L. Han, J.-P. Zhan, J.-H. Huang and G.-Z. He 236 (1998) 387

-aromatics

Photophysical and lasing properties of pyrromethene 567 dye in liquid solution. Environment effects, F. López Arbeloa, T. López Arbeloa, I. López Arbeloa, I. García-Moreno, A. Costela, R. Sastre and F. Amat-Guerri 236 (1998) 331

A study of the spectroscopic and thermodynamic properties of furan by means of photoabsorption, photoelectron and photoion spectroscopy, E.E. Rennie, C.A.F. Johnson, J.E. Parker, D.M.P. Holland, D.A. Shaw, M.A. MacDonald, M.A. Hayes and L.G. Shpinkova 236 (1998) 365

Molecular aggregates

-dimers

Interplay of creation, propagation, and relaxation of an excitation in a dimer, J. Peřina, Jr. 236 (1998) 157

-clusters

Modelling aluminium clusters with an empirical many-body potential, L.D. Lloyd and R.L. Johnston 236 (1998) 107

Emission spectra of $HeAr_2^+$ and $HeKr_2^+$ heterotrimer ions produced in a helium flowing afterglow, M. Tsuji, M. Tanaka, E. Oda, H. Ishimi and Y. Nishimura 236 (1998) 319

Free radicals (incl. hydronium and muonium)

Ultraviolet absorption spectrum and cross-sections of vinyl (C_2H_3) radical in the 225–238 nm region, A. Fahr, P. Hassanzadeh and D.B. Atkinson 236 (1998) 43

Theoretical study of the ethylene radical cation: geometry and hyperfine structure, N. Salhi-Benachenhou, B. Engels, M.-B. Huang and S. Lunell 236 (1998) 53

Isotope effect in diffusion of methyl radicals in glassy ethanol-1,2 d_5 at low temperatures, V.L. Vyazovkin and V.A. Tolkatchev 236 (1998) 291

Positronium formation and quenching in frozen and liquid solutions in octanol, F. Bockstahl, I. Billard, G. Duplâtre and A. Bonnenfant 236 (1998) 393

Quasiparticles (incl. excitons)

Role of the local electric field in electro-absorption spectra of molecular crystals, R.W. Munn 236 (1998) 151

Ions and charge carriers

Franck–Condon effects in low-energy states of $C_{10}H_8^+$ radical. Ab initio MCSCF study of absorption and resonance Raman spectra, T. Andruniow and M. Pawlikowski 236 (1998) 25

Supramolecular assemblies (incl. nanoparticles and nanostructures)

Modelling aluminium clusters with an empirical many-body potential, L.D. Lloyd and R.L. Johnston 236 (1998) 107

Liquid–liquid and liquid–solid interfaces

Electrical properties of a charged surface in a general electrolyte solution, Y.-C. Kuo and J.-P. Hsu 236 (1998) 1

Nucleic acids

Recognition and characterization of binding modes of Δ- and Λ-$[Ru(phen)_3]^{2+}$ and Δ- and Λ-$[Ru(phen)_2DPPZ]^{2+}$ by the ^{23}Na NMR relaxation and binding free energy parameters, F.C. Marincola, M. Casu, G. Saba, A. Lai, P. Lincoln and B. Nordén 236 (1998) 301

Membranes
Electrical interaction between two spherical particles covered by an ion-penetrable charged membrane, J.-P. Hsu and B.-T. Liu 236 (1998) 63

Phenomena

Molecular structure
Theoretical study of the ethylene radical cation: geometry and hyperfine structure, N. Salhi-Benachenhou, B. Engels, M.-B. Huang and S. Lunell 236 (1998) 53
Decomposition of perchlorodisiloxane, D. Wichmann and K. Jug 236 (1998) 87
Modelling aluminium clusters with an empirical many-body potential, L.D. Lloyd and R.L. Johnston 236 (1998) 107
Constant temperature simulations using the Langevin equation with velocity Verlet integration, M.G. Paterlini and D.M. Ferguson 236 (1998) 243

Vibrations and rotations of molecules
Vibrational modes in layered double hydroxides and their calcined derivatives, W. Kagunya, R. Baddour-Hadjean, F. Kooli and W. Jones 236 (1998) 225
Vibrational spectroscopy and molecular dynamics of solvated methanol tetramer and pentamer, D. Meyer zum Büschenfelde and A. Staib 236 (1998) 253

Electronic structure and states
Ultraviolet absorption spectrum and cross-sections of vinyl (C_2H_3) radical in the 225–238 nm region, A. Fahr, P. Hassanzadeh and D.B. Atkinson 236 (1998) 43
On the electronic energy disposal of calcium excited atom reactions with halogen-containing compounds: Electronic branching ratio and spin–orbit state populations, M. Garay, C.A. Rinaldi, J.M. Orea and A. González Ureña 236 (1998) 343
A study of the spectroscopic and thermodynamic properties of furan by means of photoabsorption, photoelectron and photoion spectroscopy, E.E. Rennie, C.A.F. Johnson, J.E. Parker, D.M.P. Holland, D.A. Shaw, M.A. MacDonald, M.A. Hayes and L.G. Shpinkova 236 (1998) 365

Electric and magnetic properties
Electrical properties of a charged surface in a general electrolyte solution, Y.-C. Kuo and J.-P. Hsu 236 (1998) 1
Theoretical study of the ethylene radical cation: geometry and hyperfine structure, N. Salhi-Benachenhou, B. Engels, M.-B. Huang and S. Lunell 236 (1998) 53
Electrical interaction between two spherical particles covered by an ion-penetrable charged membrane, J.-P. Hsu and B.-T. Liu 236 (1998) 63
A comparative study of the electronic structure of α-MnS (alabandite) calculated at the Hartree-Fock and Density Functional levels of theory, R. Tappero and A. Lichanot 236 (1998) 97
Electronic structure of planar superconducting systems. From finite to extended model, S. Larsson 236 (1998) 133
Role of the local electric field in electro-absorption spectra of molecular crystals, R.W. Munn 236 (1998) 151

Molecular interactions

On the $O_2(v') + O_2(v'')$ atmospheric reaction. II. The role of rotational excitation, W. Wang and A.J. C. Varandas 236 (1998) 181

Analytical theory of time-resolved fluorescence anisotropy and dynamic stokes shift of polar solute molecules based on continuum model for solvent, F. Tanaka and N. Mataga 236 (1998) 277

Recognition and characterization of binding modes of Δ- and Λ-$[Ru(phen)_3]^{2+}$ and Δ- and Λ-$[Ru(phen)_2DPPZ]^{2+}$ by the ^{23}Na NMR relaxation and binding free energy parameters, F.C. Marincola, M. Casu, G. Saba, A. Lai, P. Lincoln and B. Nordén 236 (1998) 301

Spectral bandshapes and intensities

CARS studies of bending states of CO_2: evidence of collisional rotational transitions with odd ΔJ, A.P. Kouzov, D.N. Kozlov and B. Hemmerling 236 (1998) 15

Role of the local electric field in electro-absorption spectra of molecular crystals, R.W. Munn 236 (1998) 151

Photophysical and lasing properties of pyrromethene 567 dye in liquid solution. Environment effects, F. López Arbeloa, T. López Arbeloa, I. López Arbeloa, I. García-Moreno, A. Costela, R. Sastre and F. Amat-Guerri 236 (1998) 331

Coupling of electronic and nuclear motion

Franck–Condon effects in low-energy states of $C_{10}H_8^+$ radical. Ab initio MCSCF study of absorption and resonance Raman spectra, T. Andruniow and M. Pawlikowski 236 (1998) 25

Vibronic coupling effects in the low-energy $1\,^2B_{1g}$ and $2\,^2B_{1g}$ states of the $C_{10}H_8^+$ radical, T. Andruniow and M. Pawlikowski 236 (1998) 35

Energy transfer processes

On the $O_2(v') + O_2(v'')$ atmospheric reaction. II. The role of rotational excitation, W. Wang and A.J. C. Varandas 236 (1998) 181

The mechanism of energy transfer in H_2O–H_2O collisions – a molecular dynamics simulation, H. Svedung, L.E.B. Börjesson, N. Marković and S. Nordholm 236 (1998) 189

Sub-picosecond excited-state dynamics of a carotenoid (spirilloxanthin) in the light-harvesting systems of *Chromatium vinosum*. Relaxation process from the optically allowed S_2 state, H. Okamoto, M. Ogura, T. Nakabayashi and M. Tasumi 236 (1998) 309

Molecular photophysical processes

Sub-picosecond excited-state dynamics of a carotenoid (spirilloxanthin) in the light-harvesting systems of *Chromatium vinosum*. Relaxation process from the optically allowed S_2 state, H. Okamoto, M. Ogura, T. Nakabayashi and M. Tasumi 236 (1998) 309

A study of the spectroscopic and thermodynamic properties of furan by means of photoabsorption, photoelectron and photoion spectroscopy, E.E. Rennie, C.A.F. Johnson, J.E. Parker, D.M.P. Holland, D.A. Shaw, M.A. MacDonald, M.A. Hayes and L.G. Shpinkova 236 (1998) 365

Photochemistry

Femtosecond pump–probe studies of chlorine dioxide photochemistry in water and acetonitrile, M.J. Philpott, S.C. Hayes and P.J. Reid 236 (1998) 207

Interference-effects in the laser-induced desorption of small molecules from surfaces: a model study, S. Thiel, T. Klüner and H.-J. Freund 236 (1998) 263

Ultrafast intermolecular electron transfer in coumarin–hydrazine system, H. Shirota, H. Pal, K. Tominaga and K. Yoshihara 236 (1998) 355

Luminescence spectra, yields and lifetimes
Photophysical and lasing properties of pyrromethene 567 dye in liquid solution. Environment effects, F. López Arbeloa, T. López Arbeloa, I. López Arbeloa, I. García-Moreno, A. Costela, R. Sastre and F. Amat-Guerri 236 (1998) 331
Ultrafast intermolecular electron transfer in coumarin–hydrazine system, H. Shirota, H. Pal, K. Tominaga and K. Yoshihara 236 (1998) 355
Rotational alignment from the reactions $Sr(^3P_J) + CCl_4$ and $CHCl_3$, M.-L. Wang, K.-L. Han, J.-P. Zhan, J.-H. Huang and G.-Z. He 236 (1998) 387

Reactions (incl. dissociation)
Interplay of creation, propagation, and relaxation of an excitation in a dimer, J. Peřina, Jr. 236 (1998) 157
On the electronic energy disposal of calcium excited atom reactions with halogen-containing compounds: Electronic branching ratio and spin–orbit state populations, M. Garay, C.A. Rinaldi, J.M. Orea and A. González Ureña 236 (1998) 343

-collisional
A semiclassical study of dissociation dynamics in $He + H_2$ collisions, K. Sakimoto 236 (1998) 123
On the $O_2(v') + O_2(v'')$ atmospheric reaction. II. The role of rotational excitation, W. Wang and A.J. C. Varandas 236 (1998) 181
Emission spectra of $HeAr_2^+$ and $HeKr_2^+$ heterotrimer ions produced in a helium flowing afterglow, M. Tsuji, M. Tanaka, E. Oda, H. Ishimi and Y. Nishimura 236 (1998) 319
Rotational alignment from the reactions $Sr(^3P_J) + CCl_4$ and $CHCl_3$, M.-L. Wang, K.-L. Han, J.-P. Zhan, J.-H. Huang and G.-Z. He 236 (1998) 387

Electron transfer
Ultrafast intermolecular electron transfer in coumarin–hydrazine system, H. Shirota, H. Pal, K. Tominaga and K. Yoshihara 236 (1998) 355

Proton and hydrogen atom transfer
Isotope effect in diffusion of methyl radicals in glassy ethanol-1,2 d_5 at low temperatures, V.L. Vyazovkin and V.A. Tolkatchev 236 (1998) 291

Positron annihilation
Study of positronium hydride with a simple wavefunction: Application to the Stark effect of PsH, C. Le Sech and B. Silvi 236 (1998) 77
Positronium formation and quenching in frozen and liquid solutions in octanol, F. Bockstahl, I. Billard, G. Duplâtre and A. Bonnenfant 236 (1998) 393

Ionization (incl. Rydberg states)
A study of the spectroscopic and thermodynamic properties of furan by means of photoabsorption, photoelectron and photoion spectroscopy, E.E. Rennie, C.A.F. Johnson, J.E. Parker, D.M.P. Holland, D.A. Shaw, M.A. MacDonald, M.A. Hayes and L.G. Shpinkova 236 (1998) 365

Molecular motion (incl. diffusive)
Analytical theory of time-resolved fluorescence anisotropy and dynamic stokes shift of polar solute molecules based on continuum model for solvent, F. Tanaka and N. Mataga 236 (1998) 277
Isotope effect in diffusion of methyl radicals in glassy ethanol-1,2 d_5 at low temperatures, V.L. Vyazovkin and V.A. Tolkatchev 236 (1998) 291

Isotopic effects
Isotope effect in diffusion of methyl radicals in glassy ethanol-1,2 d_5 at low temperatures, V.L. Vyazovkin and V.A. Tolkatchev 236 (1998) 291

Collective motion and excitations
Vibrational spectroscopy and molecular dynamics of solvated methanol tetramer and pentamer, D. Meyer zum Büschenfelde and A. Staib 236 (1998) 253

Surface chemical physics

-adsorption
Ultraviolet absorption spectrum and cross-sections of vinyl (C_2H_3) radical in the 225–238 nm region, A. Fahr, P. Hassanzadeh and D.B. Atkinson 236 (1998) 43

-desorption
Interference-effects in the laser-induced desorption of small molecules from surfaces: a model study, S. Thiel, T. Klüner and H.-J. Freund 236 (1998) 263

Thermodynamic and transport properties
Electrical properties of a charged surface in a general electrolyte solution, Y.-C. Kuo and J.-P. Hsu 236 (1998) 1
Constant temperature simulations using the Langevin equation with velocity Verlet integration, M.G. Paterlini and D.M. Ferguson 236 (1998) 243

Structure of solids, liquids and glasses
An intermolecular potential function for Na^+–acetonitrile obtained from ab initio calculations. Application to liquid simulations, E.M. Cabaleiro-Lago and M.A. Ríos 236 (1998) 235

Critical behavior and phase transitions
Positronium formation and quenching in frozen and liquid solutions in octanol, F. Bockstahl, I. Billard, G. Duplâtre and A. Bonnenfant 236 (1998) 393

Molecular self-assembly and -organization
Vibrational modes in layered double hydroxides and their calcined derivatives, W. Kagunya, R. Baddour-Hadjean, F. Kooli and W. Jones 236 (1998) 225
An intermolecular potential function for Na^+–acetonitrile obtained from ab initio calculations. Application to liquid simulations, E.M. Cabaleiro-Lago and M.A. Ríos 236 (1998) 235
